

HotFix KB231032 - Variable Masking passing masked value to Execute Activities in 7.0.1.0

PROBLEM

When Variable Masking is enabled, in order to prevent collected digits from being passed to log files, Execute Activities in IVR are also being passed the masked version of the digits.

RESOLUTION

This hotfix is to be installed onto Version 7.0.1.0.

1. Download the attached **KB231032.EXE** file to the Enterprise Server.
2. Double-click the **KB231032.EXE** file and follow the on-screen prompts.

NOTE: Installing this hotfix will restart the prairieFyre services. In order to avoid service interruption, we recommend applying this update after hours or during a scheduled maintenance window.

APPLIES TO

7.0.1.0

Keywords: 231032 KB231032 variable mask execute activity ivr
