

Unable to log into CCMWeb, CCMDData is set to Read-Only

PROBLEM

You are unable to log into CCMWeb, CCMDData is set to Read-Only.

SYMPTOMS

You can log into SQL Management Studio successfully, but it reports that the database is set to read-only.

WORKAROUND

NOTE: This issue is purely an SQL administration issue, and as such prairieFyre can only offer best-effort support. If the following does not resolve the issue, please consult your SQL administrator or Microsoft support.

1. Load **SQL Management Studio**.
2. Connect to the SQL server.
3. Click the **New Query** button.
4. Type **RESTORE DATABASE <CCMDData> WITH RECOVERY** and click the **Execute Now** button.
5. Re-launch the CCMWeb website.

APPLIES TO

CCM all versions.

Keywords: CCMDData read only read-only CCMWeb login SQL
