

MCC 7.1 - Configuration setting to allow previewing of drafts

INFORMATION

A manual configuration has been added to allow Ignite users to see saved Drafts when previewing email messages.

In order to implement this feature, please do the following:

1. Open the **GlobalAppSettingsEditor** located in **[InstallDir]\CCM\Services\ConfigService**.
2. Fill in the following details:

Application: Leave this empty

Section Group: enter **web.Config**

Name: enter **DraftPreview**

Value: enter **True** to enable the feature.

Description: Add a note on why this is being changed. **NOTE:** You must enter something in this field in order to save.

3. Click **Save**. Note that saving these changes can take 30 to 60 seconds. Wait until you get a confirmation screen to close the GlobalAppSettingsEditor.

APPLIES TO

7.1

Keywords: global applications settings editor draftpreview draft preview
