

DNIS information is showing the destination digits instead of the original 10 digits dialed after upgrading MiVoice Business to 8.0.

PROBLEM

The DNIS information for a call is showing the destination digits instead of the original 10 digits dialed.

The MiVoice Business was recently upgraded to version 8.0.

RESOLUTION

A software fix will be provided in MiVoice Business version 8.0 SP1.

APPLIES TO

MiCC, 8.X and newer

Keywords: DNIS MiVB mivoice business
