

## Hot Fix KB97666 - 5.8.0.9 - Improved logging for intermittent WFS crashes

---

### PROBLEM

One site has seen intermittent WFS crashes on both server and client computers. This hot fix is intended to increase logging in order to help diagnose the issue correctly.

### RESOLUTION

This hot fix is to be installed on top of 5.8.0.9.

1. Download the attached **KB97666.EXE** file to the Enterprise server.
2. Double click the **KB97666.EXE** file and follow the on-screen prompts.

**NOTE:** Installing this hot fix will include a stop and restart of your prairieFyre services. In order to avoid any service interruptions, we recommend installing this hot fix after hours, or during a scheduled maintenance window.

### APPLIES TO

WFS 5.8.0.9

**Keywords:** improved logging wfs crash
