

HotFix KB172578 - MiXML Writeback does not correctly save agent group overflow value of zero

PROBLEM

When your agent group overflow value is set to zero seconds, and you perform a writeback to the PBX, the value written during writeback is set to Null, and therefore never receive the overflow.

RESOLUTION

This issue is resolved in release 6.0.3.0 available on [Mitel.com](http://mitel.com)

APPLIES TO

6.0.2.3

Keywords: 172578 KB172578 writeback overflow zero 0
