

## HowTo - Specify Spell Check dictionary languages in Ignite (7.1.2.1 and newer)

### INFORMATION

By default the Spell Checker in MCC checks against multiple available dictionaries, which includes a number of different languages. This could result in words not being correctly identified as misspelled if they exist in another language. In 7.1.2.1 we have added a manual configuration allowing you to specify which languages it should check against.

The available languages are:

**da:** Danish  
**de:** German  
**en:** English (a combination of US/CA/GB)  
**en\_CA:** English, Canadian  
**en\_GB:** English, UK  
**en\_us:** English, US  
**es:** Spanish  
**fr\_FR:** French, France  
**nb\_NO:** Norwegian  
**it:** Italian  
**nl:** Dutch  
**pt:** Portuguese  
**pt\_BR:** Portuguese, Brazilian  
**sv\_SE:** Swedish

By default the spell checker is configured for: *en,da,de,es,fr\_FR,nl,nb\_NO,it,pt\_BR,sv\_SE*

### CONFIGURATION

In order to use this configuration option you must be running MiCC Version 7.1.2.1 or newer.

1. On the MiCC server go to **[InstallDir]\CCM\Services\ConfigService\**.
2. Launch the **GlobalAppSettingsEditor.exe**.
3. Fill in the following details:
  - Application:** (leave this blank)
  - SectionGroup:** *appSettings*
  - Name:** *SpellcheckLanguage*
  - Value:** (enter the languages you wish to check against, separated by comma and no spaces)  
eg: **Value:** *en,fr\_FR, de* (this would check against general english, France french, and German)
  - Description:** (you can enter anything you wish here, but must enter something)
4. Click **Save**. Note that it takes between 30 and 60 seconds to complete the save. Wait for the confirmation prompt.
5. Go to the start menu or screen and type **cmd** then select the Command Prompt.
6. Type **iisreset** and hit **Enter**.

### APPLIES TO

MCC 7.1.2.1 and newer
