

VWM Branch Condition Report values change after summarization

PROBLEM

If you run a VWM Branch Condition Report on the same day, values appear to be accurate. Once you have summarized the data, the 'Number of times entered' statistic appears to be double pegging.

RESOLUTION

This issue is pegged for resolution in 6.0.2.1.

Internal reference number (TFS) 95594

APPLIES TO

6.0.1.1

Keywords: 95594 vwm branch condition report summarization summarize
